UMC 817.121

The room and pillar mining method used at Emery is a commonly used practice in the mining industry. While unplanned subsidence is possible and has occurred in the past, the subsidence control plan is being and will be followed as prepared pursuant to UMC 784.20.

UMC 817.122

Consol shall submit written notice to surface property owners at least six months prior to mining under or adjacent to their property. Such notice shall include:

1. Identification of the specific areas in which mining will occur with the estimated dates of underground operations.
2. Measures to prevent, minimize or control subsidence.

The following property owners shall be notified by certified mail six months prior to mining under or adjacent to their property:

Please refer to Chapter I, Appendix 1-2 for a complete list of surface owners that will be notified.

Consol sent re-notification letters to landowners on 2/16/07. This was done due to the change in surface control in several areas. Refer to DOGM inspection #1443, dated 10/23/07 for inspector verification of the letters. Copies of the notifications were forwarded to the Division.
